

HOW TO USE AN AAPC CODE CARD

The documents below consist of three pages:

- One is the vendor code card it includes the title, index number, and number of CEUs for each session.
- The second is the attendee code card it has the same information with the exception of the index number.
- Each AAPC member attendee should be given the **attendee code card** prior to the start of the conference.

The index number:

- The index number of a session should be released to the attendees at the close of the approved sessions.
 - The presenter can do this by putting the index number on their last slide or writing it on a white board.
 - It is the responsibility of the attendee to write the index number on their code card and retain the document.

The Member Responsibility:

- The member will enter the index numbers into their AAPC CEU tracker upon completion of the conference.
- The member will need to retain the code card for CEU submission and possible random audit.

CEU APPROVED

For your convenience, the AAPC has approved the sessions for both a core credential and a specialty credential. You may use a specific session for your specialty CEUs or for your core credential CEUs. The use of one session for both specialty and core CEUs is not permitted.

Total CEU's: _____

Please Note: Coders may claim all of their CEUs earned from Core A, the technical side of professional medical coding. Core B, which addresses general business skills, can comprise no more than 33% (1/3) of the total CEUs earned per year. Therefore, if one core credential is held, 12 of the 36 total CEUs due every two years may be from Core B. Core approvals are identified by either an "A" or a "B" at the end of an index number.

The CEU Code Card replaces AAPC Certificates for this event.
