

## Learning Objectives

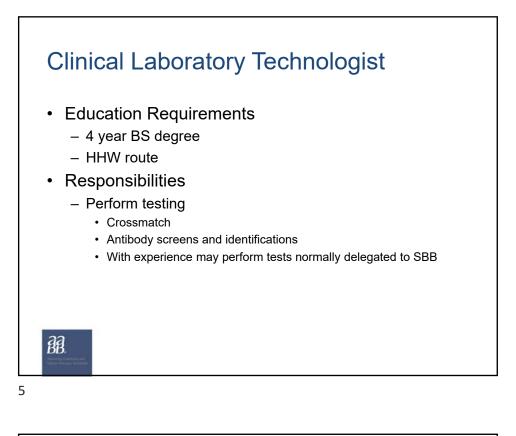

After participating in this program you should be able to....

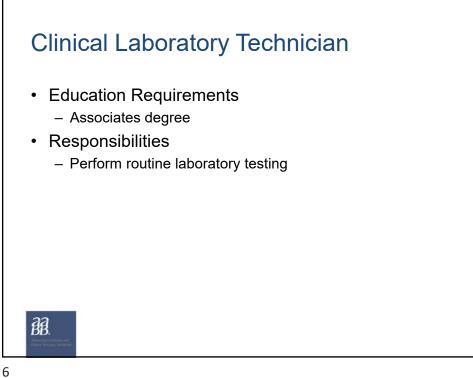

- Define and discuss medical professionals who collect, oversee or manufacture blood components.
- Describe the role of the FDA, CLIA and other regulatory bodies in blood manufacturing.
- Explain the operational logistics required in determining appropriate blood inventory for a geographic region and the process of meeting daily, weekly, and monthly collection goals.

## Factors To Consider When Setting Up a Blood Drive

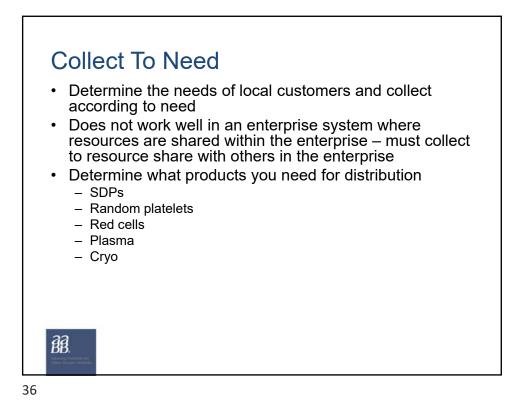

- · Size of the organization
- Demographics of employees
- · Proximity to fixed site
- Distance from processing facility
- Availability of staff
- Availability of room or will mobile bus be needed
- Champion?

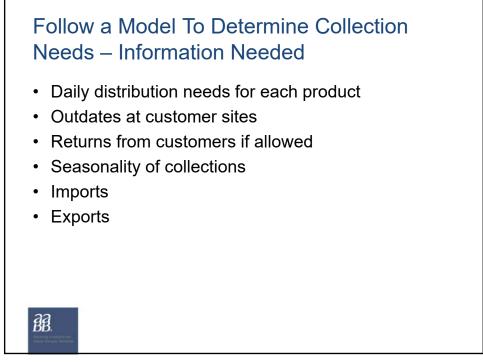

### BB

33

- Number of customers
- · Par levels of those customers for various products
- Transfusion patterns of customers
- · Ordering patterns of customers
- · Services offered by customers
- Outdate rates of customers
- Availability of blood and blood products, particularly around holidays
- · Outside sources for meeting demand
- · Is the customer associated with an academic facility?
