On Demand Webinar Activity Overall Goal:

This CE activity serves to promote the process of life-long learning for physicians, dietitians, pharmacists, and nurses who specialize in the sciences of clinical nutrition and metabolism.

Goal and Target Audience:

This educational activity is directed toward clinical nutrition and metabolism professionals and others who wish to update their knowledge of clinical nutrition and metabolism. By participating in this educational activity, the reader may expect to:

- Acquire knowledge in the area of clinical nutrition and metabolism research.
- Update or confirm your understanding of appropriate clinical nutrition and metabolism practices.
- Identify further learning needs as they relate to the subject matter.

Webinar Description:

Most bedside clinicians can identify areas of clinical nutrition practice that could be optimized if nutrition care followed the most up-to-date research. Implementation science seeks to accelerate the integration of evidence-based approaches into routine practice, helping reduce knowledge gaps, narrow variation, and improve care.

This program will review implementation science, describe frameworks that are researched in the field, and illustrate how practitioners can leverage those findings to improve practice.

Learning Objectives:

1. Compare and contrast diffusion, dissemination, and implementation.
2. Explain areas of clinical nutrition practice where research has not been fully disseminated into practice.
3. List and describe Implementation Science Frameworks and potential application to areas of clinical nutrition practice.
