Feed Your Mental Health

Drew Ramsey, MD Founder, The Brain Food Clinic Assistant Clinical Professor of Psychiatry Columbia University

Learning Objectives

- 1. Rapidly assess a patient's diet for high-yield nutritional interventions
- 2. Appreciate the central tenets of Nutritional Psychiatry
- 3. Review the recent evidence and RCTs connecting food choice and depression
- 4. Gain confidence in partnering with patients on foods and dietary patterns linked to depression risk
- 5. Review the key food categories in Nutritional Psychiatry

Ramsey Disclosures

- Editorial Board, Medscape Psychiatry
- Advisory Board, Men's Health Magazine
- Author
- I will not discuss the off-label use of any medications

Ramsey Big 5 Nutritional Psychiatry Self-Assessment (RB5NP-S)

1. Besides a salad, I eat greens as _____ 2. My three favorite fiber foods? 3. I love to dip _____ in olive oil. 4. My Seafood meals this week will be 5. This week I have eaten CFUs. Bonus: As an eater, I feel too much guilt about and not enough JOY about

Can What We Eat Affect How We Feel?

Nutritional psychiatrists counsel patients on how better eating may be another tool in helping to ease depression and anxiety and may lead to better mental health.

Tony Cenicola/The New York Times

By Richard Schiffman March 28, 2019

WHO MADE THAT?

Who Made That Kale?

Jens Mortensen for The New York Times

By Pagan Kennedy Oct. 18, 2013

How Food May Improve Your Mood

The sugar-laden, high-fat foods we often crave when we are stressed or depressed, as comforting as they are, may be the least likely to benefit our mental health.

\$1 TRILLION

- Lost productivity worldwide due to depression and anxiety
- #1 Worldwide Cause Disability
- US Depression economic burden increased 37.9% from 2010 →2020 \$236.6B →\$326.2B

Nutritional Psychiatry

The use of nutrition to optimize brain health and to treat and prevent mental health disorders.

Personal View

THE LANCET Psychiatry

Nutritional medicine as mainstream in psychiatry

Jerome Sarris, Alan C Logan, Tasnime N Akbaraly, G Paul Amminger, Vicent Balanzá-Martínez, Marlene P Freeman, Joseph Hibbeln, Yutaka Matsuoka, David Mischoulon, Tetsuya Mizoue, Akiko Nanri, Daisuke Nishi, Drew Ramsey, Julia J Rucklidge, Almudena Sanchez-Villegas, Andrew Scholey, Kuan-Pin Su, Felice N Jacka, on behalf of The International Society for Nutritional Psychiatry Research

"Although the determinants of mental health are complex, the emerging and compelling evidence for nutrition as a crucial factor in the high prevalence and incidence of mental disorders suggests that diet is as important to psychiatry as it is to cardiology, endocrinology, and gastroenterology."

Brain-Derived Neurotrophic Factor (BDNF)

- Promotes neuron development, function, and survival
- Most abundant neurotrophin
- BDNF & it's TrkB receptor

Dietary recommendations for the prevention of depression

R.S. Opie, C. Itsiopoulos, N. Parletta, A. Sanchez-Villegas, T.N. Akbaraly, A. Ruusunen & Pages 161-171 | Published online: 02 Mar 2016

- 1. Follow 'traditional' dietary patterns, such as the Mediterranean, Norwegian, or Japanese diet
- 2. Increase consumption of fruits, vegetables, legumes, wholegrain cereals, nuts, and seeds
- 3. Include a high consumption of foods rich in omega-3 polyunsaturated fatty acids
- 4. Replace unhealthy foods with wholesome nutritious foods
- 5. Limit your intake of processed-foods, 'fast' foods_{DREW RAMSEY} (MIC) commercial bakery goods, and sweets.

A Mediterranean-style dietary intervention supplemented with fish oil improves diet quality and mental health in people with depression: A randomized controlled trial (HELFIMED)

Natalie Parletta, Dorota Zarnowiecki, Jihyun Cho, Amy Wilson, Svetlana Bogomolova, Anthony Villani, Catherine Itsiopoulos, Theo Niyonsenga, Sarah Blunden, Barbara Meyer, Leonie Segal, Bernhard T. Baune & Kerin O'Dea

Figure 4 DASS depression scores at baseline, 3 and 6 months. 25

- N = 152
- MedDiet cooking workshops for 3 months + low-dose fish oil 6 months vs. social groups for 3 months
- Depression scores improved by:
 - 45% in the MedDiet
 - 26.8% in the Social group.
- Changes sustained at 6 months.

7 Surprising Foods that Fight Depression and Anxiety DREW RAMSEY

The Mental Fitness Kitchen gives people tools to support their mental health while fostering community. We know the impact that food can have on our wellbeing and have seen from numerous studies that learning these hands-on skills and putting them into practice in a connection with one another can greatly impact mental health, and can reduce symptoms of depression. When we get together in the kitchen and cook, it is nourishing on multiple levels.
