Postmarketing Surveillance: What's the Next Move?

11:00 am – 11:45 am EDT

Postmarketing Surveillance: What's the Next Move?

Richard C. Dart, MD, PhD

*Executive Director, RADARS[®] System, Rocky Mountain Poison & Drug Safety,
Denver Health and Hospital Authority
President, Canadian Consumer Product and Pharmaceutical Safety Inc.*

RADARS System continues to provide rapid and accurate data for prescription drug misuse of all types. The past year has seen continuing shifts in abuse and deaths from various prescription drugs. This talk will set the stage for subsequent discussions about the remarkably diverse set of psychoactive drugs that are being abused and causing death in the United States, Europe, and Canada.

11:45 am – 12:15 pm EDT

Meeting the Challenges of COVID-19 in Postmarketing Surveillance

Janetta L. Iwanicki, MD

*Chief Scientific Officer, Research and Consulting, Rocky Mountain Poison & Drug Safety,
Denver Health and Hospital Authority*

The novel coronavirus pandemic has provided unique challenges and changed the world we live in, with significant impacts both on substance use and on how we can measure those patterns of use. This talk will explore impacts of COVID-19 on substance use and data collection, treatment of substance use disorders, policy changes, and lessons learned for future public health challenges.

12:15 pm – 12:45 pm EDT

Defining Populations of Interest for Postmarketing Studies

Nabarun Dasgupta, MPH, PhD

*Senior Scientist and Innovation Fellow, Gillings School of Global Public Health,
University of North Carolina in Chapel Hill
Consultant – RADARS[®] System, Rocky Mountain Poison & Drug Safety, Denver Health and Hospital Authority*

We examine three sub-populations of interest relevant to opioid safety studies, including people with chronic pain and those with problematic nonmedical use. Measurement issues and causal inference will be discussed.

12:45 pm – 1:00 pm EDT

Break

THURSDAY, MAY 13, 2021

Postmarketing Surveillance: What's the Next Move?

1:00 pm – 2:15 pm EDT

The Rest of the Story: Other Drugs Misused in the United States

Janetta L. Iwanicki, MD (Moderator)

Chief Scientific Officer, Research and Consulting, Rocky Mountain Poison & Drug Safety, Denver Health and Hospital Authority

Prescribing and Over-The-Counter Drugs; A Vast Range of Misusing Opportunities

Professor Fabrizio Schifano

Chair in Clinical Pharmacology and Therapeutics and Consultant Psychiatrist (Addictions); Psychopharmacology, Drug Misuse and Novel Psychoactive Substances Research Unit, School of Life and Medical Sciences, University of Hertfordshire, UK

A large number of approved drugs, both prescription and non-prescription, are abused, and the abuse of non-traditional drugs is increasing. This talk will present the abuse of prescription drugs in the context of novel psychoactive substances.

Understanding Stimulant Use in the General Population: Prevalence and Patterns of Non-Medical Use

Joshua C. Black, PhD

Senior Research Scientist, Rocky Mountain Poison & Drug Safety, Denver Health and Hospital Authority

This talk will provide a broad understanding of the prevalence of stimulant non-medical use, the reasons and methods of non-medical use, and trends over time. Data demonstrate that adults who non-medically use stimulants are a heterogeneous group with different patterns and motivations of use.

It's not Easy Being Buprenorphine: Identifying Unique Substance Use Patterns Associated with Buprenorphine

Matthew Ellis, MPE, PhD(c)

Research Faculty Instructor, Department of Psychiatry, Washington University in St. Louis, School of Medicine

Shifting policies and perceptions have driven the expansion of buprenorphine as a gold standard in the treatment of opioid use disorder. As buprenorphine dispensing increases, it is necessary to monitor adverse outcomes or changes in substance use patterns associated with buprenorphine medications. This talk will discuss recent patterns in buprenorphine-associated substance use among individuals entering treatment for opioid use disorder across the United States.

THURSDAY, MAY 13, 2021

Postmarketing Surveillance: What's the Next Move?

Changes in Diversion of Buprenorphine and Gabapentin

Mance E. Buttram, PhD

Associate Professor, Nova Southeastern University

Associate Director, Center for Applied Research on Substance Use and Health Disparities

Recent attention has been given to the misuse of buprenorphine and gabapentin among people who use opioids. However, systematic data related to diversion are lacking. This presentation will examine changes in the diversion of buprenorphine and gabapentin over time, as well as qualitative data describing motivations for diversion and misuse.

2:15 pm – 2:45 pm EDT

FDA's Holistic Approach to Addressing Polysubstance Use and the Drug Overdose Crisis

Marta Sokolowska, PhD

*Associate Director for Controlled Substances, Office of the Center Director,
Center for Drug Evaluation & Research, Food & Drug Administration*

FDA takes a holistic approach to addressing the risks of polysubstance use and the drug overdose crisis. One of our highest priorities is advancing development of novel treatments for different substance use disorders. We will discuss our efforts in this space, including funding research, gathering stakeholder input, and exploring novel measures and meaningful endpoints.

2:45 pm – 3:30 pm EDT

Panel Discussion and Summary

Richard C. Dart, MD, PhD (Moderator)

*Executive Director, RADARS[®] System, Rocky Mountain Poison & Drug Safety,
Denver Health and Hospital Authority
President, Canadian Consumer Product and Pharmaceutical Safety Inc.*

3:30 pm EDT

Adjournment
